

Unlock Your Workforce Potential

Leading Edge *Professional* Development Corporate Team Building

Team building with purpose!

Whether you want to plan for your next project or quarter or achieve greater communication between your team members, our Team Building with Horses programs provide a unique opportunity to do just that and more.

So what makes this team building program so different? Having honest, immediate and totally non-judgmental feedback, horses are a leveller that no human can match. They have no agenda, and know nothing about the office politics – they don't know if you are a CEO or an intern. Horses react to the real person.

As prey animals, horses are highly sensitive to the energy, intention, actions and body language of humans. They serve as a barometer for communication helping individuals recognise how their non-verbal cues may impact their relationships within the team.

Participants work in small groups with our horses, facilitated by our leadership coaches, to:

- Strengthen leadership and communication skills
- Recognise the value of trust, respect, integrity and teamwork
- Develop positive relationships with self and others
- Accept responsibility and accountability
- Build self-awareness and self-confidence
- Overcome barriers, build flexibility and embrace change

Everything you need to know about your team's communication and dynamics!

For more information and bookings:

leadingedgeprofessionaldevelopment.com.au
